Email Address

CAREFULLY PACKAGE YOUR METER FOR SHIPPING

*Package the instrument carefully with adequate cushioning, and in a very sturdy container. **Do not ship a meter in an envelope.***

Do not use spray foam. Spray foam can damage the meter, and it is also possible to "lose" the meter in a chunk of spray foam.

TURN-AROUND TIME**STANDARD:**

Turn-around time is *about two weeks*.

EXPEDITED:

Turn-around time may be less if you send a completed Purchase Order that allows an option for repair time and specifies that you need EXPEDITED handling.

An EXPEDITED calibration of less than one week may result in an additional fee.

If you wish to request expedited calibration, please contact Sales at 480-991-6744 before shipping the meter to Shortridge Instruments, Inc., so that this cost may be added to your Purchase Order *prior* to shipment.

MAINTENANCE INFORMATION It is suggested that each AirData Multimeter be returned to the factory at least every two years for recalibration, maintenance, and software updates.

This will keep every meter up-to-date with ongoing improvements and new features as they are developed; and most importantly, continued maintenance will assure that each meter's original accuracy is maintained throughout the lifetime of the meter.

ALL SALES ARE FACTORY DIRECT ONLY

Shorridge Instruments, Inc. does not retain outside sales agents or representatives.

CALIBRATION SERVICES

No, calibration services are not available for instruments manufactured by other companies.

SHORTRIDGE INSTRUMENTS, INC. only provides factory direct calibration for the instruments *manufactured by Shorridge Instruments, Inc.*
